PROFESSIONAL SUMMARY

Product Manager with 4 years of experience building B2B and consumer products from discovery to launch. Completed a Master's in Computing to strengthen technical expertise, with hands-on experience in AI systems including RAG pipelines, agentic workflows, and LLM evaluation frameworks. Brings strong product judgement and technical fluency to partner closely with engineering teams and deliver scalable, production-ready AI-enabled product experiences.

CORE COMPETENCIES

- Product Strategy & Roadmapping
- 0-1 Product Development
- Lifecycle CRM & Monetisation
- Cross-functional Collaboration & Leadership
- AI/LLM Products (RAG, Agentic AI, LLM Eval)
- Data Analysis & Product Metrics
- Experimentation & A/B Testing
- Technical Prototyping

WORK EXPERIENCE

Lifecycle Product Manager, Coffee Meets Bagel, Singapore

Dec 25 - Feb 26

Consumer dating platform serving millions of users globally

- Managed lifecycle CRM initiatives across onboarding, engagement, and monetisation funnels
- Designed and executed A/B experiments to optimise lifecycle conversion and revenue
- Coordinated cross-functional initiatives involving product, data, and marketing teams

Key Achievements

- Launched D2-D3 onboarding sale experiment, increasing subscription conversion by 5%
- Built CRM workflows and documentation, scaling execution from ~2 to ~14 initiatives/month

Product Developer Intern, Government Investment Corporation, Singapore

May 24 - Sep 24

Sovereign wealth fund leveraging technology to optimize operational efficiency

- Prototyped internal AI solutions to improve enterprise knowledge discovery across onboarding materials and SOPs
- Collaborated with internal stakeholders to design and evaluate the feasibility of LLM-powered enterprise tools

Key Achievements

- Built enterprise knowledge assistant using RAG architecture across 120+ documents
- Build agentic AI workflows with structured outputs, autonomous retrieval and reasoning
- Implemented evaluation framework measuring response accuracy, grounding, and quality

Product Management Intern, The Pique Lab, Singapore

May 23 - Jul 23

Education centre leveraging digital tools for efficient internal management

- Supported product development of the company's internal education platform

Key Achievement

- Defined and rolled out company's first access control framework, replacing ad-hoc permissions with standardized access rules across all modules

Product Manager, Vouch, Singapore

Oct 19 - Dec 22

B2B SaaS startup boosting revenue and efficiency for travel businesses

- Led Attractions business vertical, defining product strategy for museums and attractions
- Led a cross-functional product team across engineering, design, and commercial stakeholders to deliver visitor experience products to businesses

Key Achievements

- Established and scaled the Attractions vertical, generating \$450K in new ARR
- Led delivery of National Heritage Board (NHB) digital visitor experience project, deploying AI-powered conversational guides across 10 museums and attractions for 100K+ visitors
- Led 0-to-1 development of Digital Ticketing platform, achieving 43% online ticket conversion rate and 8K monthly signups
- Coordinated migration to Government Cloud infrastructure, collaborating on architecture planning, CI/CD pipelines, and deployment

AI PROJECTS

Innerra - AI emotional companion app

- Designed AI emotional insight system that extracts themes, relationships, and recurring patterns from user conversations
- Designed a multi-layer memory architecture with session analysis, weekly insight generation, and semantic retrieval for persistent context across conversations

EDUCATION

National University of Singapore

Master of Computing (General Track) - CAP 4.46/5.0

Singapore

Jan 23 – Nov 24

University College London

Bachelor of Arts, History of Art - First Class Honours

London, UK

Sep 14 – Jul 17

SKILLS

- **AI Systems:** RAG pipelines, LLM evaluation frameworks, agentic workflows, prompt engineering
- **Technical:** Python, SQL, Node.js, React, MongoDB, REST APIs
- **Certifications:** AWS Cloud Practitioner (in progress), Complete Node.js Developer Course
- **Languages:** English (Native), Chinese (Native)
