PROFESSIONAL SUMMARY

Product Manager with 4 years of experience building B2B and consumer products from discovery to launch. Completed a Master's in Computing to strengthen technical expertise, with hands-on experience in AI systems including RAG pipelines, agentic workflows, and LLM evaluation. Combines strong product judgment with technical fluency to deliver scalable AI-enabled products.

CORE COMPETENCIES

- Product Strategy & Roadmapping
- 0-1 Product Development
- Lifecycle CRM & Monetisation
- Cross-functional Collaboration & Leadership
- AI Product Development (RAG, Agentic AI)
- Data Analysis & Product Metrics
- Experimentation & A/B Testing
- Technical Prototyping

WORK EXPERIENCE

Lifecycle Product Manager, Coffee Meets Bagel, Singapore Dec 2025 - Feb 2026

- Owned lifecycle experimentation across onboarding and monetisation funnels, running A/B tests to optimise conversion and revenue
- Launched D2-D3 onboarding sale experiment, increasing subscription conversion by 5%
- Built CRM workflows and documentation, scaling execution from ~2 to ~14 initiatives/month

Product Developer Intern, Government Investment Corporation, Singapore May 2024 - Sep 2024

- Built prototype enterprise knowledge assistant using RAG architecture across 120+ documents
- Designed agentic workflows enabling knowledge retrieval and multi-step reasoning
- Implemented evaluation framework measuring response accuracy, grounding, and answer quality

Product Management Intern, The Pique Lab, Singapore May 2023 - Jul 2023

- Defined and rolled out company's first access control framework, replacing ad-hoc permissions with standardized access rules across all modules

Product Manager, Vouch, Singapore Oct 2019 - Dec 2022

- Established and scaled Attractions business vertical, generating \$450K in new ARR
- Drove cross-functional execution across engineering, design, and commercial teams
- Delivered NHB digital visitor experience project across 10 museums, deploying AI-powered conversational guides for 100K+ visitors
- Built and launched 0-to-1 Digital Ticketing platform, achieving 43% conversion
- Coordinated migration to Government Cloud infrastructure, collaborating with technical teams on infrastructure setup, data migration, and CI/CD pipelines

EDUCATION

National University of Singapore

Singapore

Master of Computing (General Track) - CAP 4.46/5.0

Jan 2023 - Nov 2024

University College London

London, UK

Bachelor of Arts, History of Art - First Class Honours

Sep 2014 - Jul 2017

SKILLS

- **AI Systems:** RAG pipelines, LLM evaluation, agentic workflows, prompt engineering
- **Technical:** Python, SQL, Node.js, React, MongoDB, REST APIs
- **Certifications:** AWS Cloud Practitioner (in progress), Complete Node.js Developer Course
- **Languages:** English (Native), Chinese (Native)
